PROFESSIONAL EXPERIENCE

Check Point Software Technologies Ltd.

September 2021 - April 2026

Customer Success Operations Manager

College Station, TX (Remote)

- Owned front-line communication and triage for the HEC customer distribution list, resolving customer and Sales inquiries across email security, SSO, DLP policy configuration, portal issues, onboarding readiness, and escalation paths; coordinated cross-functional war rooms with CSM, Support, Engineering, and Product Management, achieving 99% dedicated CSM coverage for enterprise clients over \$50K and new-account onboarding outreach within a two-week SLA while ensuring internal-process compliance.
- Reduced customer churn to under 30% within one year by implementing targeted retention playbooks, proactive client outreach, and regular health checks; aligned customer goals with SaaS product outcomes, strengthened client success, and improved adoption, satisfaction, and renewals through KPI-driven strategies.
- Coordinated crisis response and incident resolution with cross-functional teams using Jira, AWS, Azure, and Salesforce CRM, improving time-to-resolution and contributing to a 20% sales increase within 6 months through stronger operational alignment and project management for enterprise SaaS clients.
- Leveraged Salesforce CRM and Custify to track customer interactions, identify upsell and cross-sell opportunities, and present ROI to stakeholders; increased customer-portfolio visibility from 40% to 99%, enhancing account management and client satisfaction while integrating AI-driven insights to optimize engagement as a Customer Success Product Specialist.

Check Point Software Technologies Ltd.

November 2020 - September 2021

Customer Success Manager

College Station, TX (Remote)

- Managed a rotating book of 20–40 customer accounts, from sub-\$50K accounts to multi-million-dollar strategic relationships totaling approximately \$3M in account value; segmented coverage by renewal timing, adoption maturity, technical risk, customer complexity, and stakeholder engagement to support approximately 70% customer retention within six months and strengthen client success.
- Led usage reviews, telemetry analysis, health checks, and business reviews to surface adoption gaps, product friction, and renewal risk; used clear customer communication to build action plans and coordinate mitigation with Sales, Engineering, and Support, contributing to 99.9% portal uptime and identifying needs-based upsell opportunities, particularly in legal tech.
- Built and maintained Customer Success Plans for enterprise clients, aligning business objectives, technical milestones, timelines, and stakeholder ownership; accelerated feature adoption, strengthened executive alignment, and contributed to 90%+ CSAT through proactive customer-facing problem-solving and value realization.

- Developed strategic enterprise relationships through proactive communication and direct management of complex technical needs, achieving over 90% CSAT and 70% customer retention within six months while supporting renewals, upsell strategies, and email security requirements.
- Balanced competing customer priorities, technical needs, and delivery responsibilities by identifying redundant work, clarifying ownership, and improving customer-facing workflows; increased team efficiency by 30% and contributed to a 3% year-over-year improvement in customer retention through collaboration with Product Management and Support.

Dedrone

January 2020 - September 2020

Customer Success Manager

Sterling, VA (Remote)

- Spearheaded client success initiatives that increased renewals 20% through strategic onboarding, proactive client engagement, and AI-driven SaaS insights, accelerating sales and customer adoption.
- Built and implemented an enterprise Customer Success onboarding program that standardized onboarding to one month and increased engagement 25% within six months through streamlined processes, automation, and autonomous execution.
- Secured stakeholder buy-in for a \$3M deal by presenting AWS-hosted dashboards and drone detection workflows during high-profile customer tours, strengthening client trust within 60 days through clear communication and customer-focused agency.
- Increased renewal rates 20% through proactive engagement and continuous improvement of customer health and churn metrics; established cross-team communication channels and shared expectations to improve collaboration, retention, and project execution.

Cofense (Formerly PhishMe)

November 2015 - January 2020

Technical Operations Center Manager for Reporter Triage & Vision

Leesburg, VA (Remote)

- Directed global support operations for Cofense's email security phishing-defense SaaS products, leading a customer-facing team to maintain system reliability and uptime while applying Agile methodologies, CRM strategies, and customer-focused communication to resolve technical issues.
- Mentored a geographically dispersed team of Support Engineers providing technical support for the Cofense Reporter plugin and Triage and Vision offerings, achieving 65% product coverage and strengthening customer success across marketing technology, CRM integration, and SaaS environments.
- Implemented Agile knowledge-sharing and communication processes in Confluence, creating self-service technical articles that deflected 30% of new tickets, achieved a 90% average CSAT rating, and reduced First Response Time by 30 minutes within 3 months.

Cofense (Formerly PhishMe)

November 2015 - January 2020

Solutions Engineer

Leesburg, VA (Remote)

- Delivered L3 technical support for integrated email client security solutions, strengthening client communication between engineering and customers, reducing critical-issue resolution time by 25%, and improving customer success through Professional Services, Excel analysis, and reporting.
- Led Agile project management as Scrum Master and Interim Product Owner, improving team collaboration and communication, accelerating release cycles by 30% within 6 months, reducing operational redundancy by 20%, and aligning delivery with technical architecture best practices.
- Created and maintained product and process documentation in Confluence, reducing support tickets by 40% and accelerating PhishMe Reporter onboarding for its Lotus Notes SaaS solution; managed technical projects and budgets, saved tens of thousands of dollars, and used web services and Excel to track metrics and increase customer adoption.

Texas A&M University System

February 2013 - October 2015

User Services Manager, Bush School of Government & Public Service

College Station, TX

- Directed IT services and infrastructure management for the Bush School, improving system performance, customer success, budget efficiency, operational workflows, technical architecture, user adoption, and communication while maintaining industry-standard compliance.
- Oversaw video teleconference operations using enterprise IP systems and web services; developed hardware and software specifications and improved production control, disaster recovery, and networking, reducing annual costs by 15% through operational efficiencies while strengthening customer success, user adoption, communication, and compliance.
- Deployed a SpiceWorks ticketing system, increasing issue-resolution efficiency by 35% within 6 months and enabling historical analysis and self-service support; managed computing systems testing and application deployment in Docker and VMware, standardizing images and achieving 99.5% uptime during peak periods while supporting customer success, user adoption, communication, and compliance.

IBM

June 2007 - February 2013

Enterprise Software Engineer

Austin, TX

- Delivered expert Lotus Notes/Domino enterprise support, strengthening technical architecture, communication, operational efficiency, and client success for global enterprise clients.
- Provided 24x7 remote Lotus Notes/Domino support, resolving complex issues to achieve 99.9% uptime and 95+% customer satisfaction; ranked in the top 10% of 85 Austin division engineers, reinforcing client success.
- Developed and implemented comprehensive training for cross-functional teams and external audiences, increasing training materials by 30%, reducing staff ramp-up time by 20%, and improving efficiency by 25% through clear communication, enhancing client satisfaction and engagement.

PROJECTS & OUTSIDE EXPERIENCE

Personal AI Exploration Initiative

Self-Hosted AI Server for Private Chat, Web Search, Persistent Memory, and Image Generation College Station, TX, USA

- Engineered a self-hosted generative AI server for local Stable Diffusion image generation, fine-tuning, and inference, demonstrating autonomous ownership, GPU-accelerated computing, and innovative content creation.
- Configured and optimized Stable Diffusion environments, including Automatic1111 WebUI, ComfyUI, and Forge, with Docker and CUDA to enable low-latency image generation on consumer-grade hardware and support advertising technology applications.
- Designed and deployed the AI server architecture, independently handling hardware selection, OS installation, driver configuration, and performance tuning for complex generative AI workloads.
- Skills: Familiar with autonomy and agency in self-directed AI infrastructure development.

RenewNudge, AI Powered Customer Success CRM - [Link to project](#)

May 2026 - Present

Fully functional, solo built SaaS for renewal tracking, account health, and retention workflows College Station, TX, USA

- Designed, built, and deployed independently a fully functional, multi-tenant AI-powered Customer Success CRM with React, TypeScript, TanStack Start, Supabase, and Tailwind, supporting renewal tracking, account health monitoring, and retention workflows.
- Architected a secure multi-tenant Postgres backend with Row Level Security, role-based workspace membership, and SECURITY DEFINER policy helpers; conducted security scans and resolved findings to eliminate cross-tenant data exposure.
- Delivered end-to-end authentication with email/password and Google OAuth, team invites, and per-workspace seed and wipe flows, enabling users to sign up, invite teammates, and load sample data in under a minute.
- Applied customer success expertise in renewals, QBR preparation, health scoring, and at-risk playbooks to turn scattered CSM activities into a prioritized, action-oriented retention workflow for client success teams.
- Skills: Familiar with AI-powered SaaS product development, Customer Success CRM workflows, renewal tracking, account health monitoring, retention workflows, multi-tenant architecture, Postgres Row Level Security, role-based access control, SECURITY DEFINER policies, security scanning, React, TypeScript, TanStack Start, Supabase, Tailwind, email/password authentication, Google OAuth, team invitations, workspace seed and wipe flows, QBR preparation, health scoring, and at-risk playbooks.
