PROFESSIONAL EXPERIENCE

Check Point Software Technologies Ltd.

September 2021 - April 2026

Customer Success Operations Manager

College Station, TX (Remote)

- Owned front-line triage for the HEC customer distribution list, resolving customer and Sales inquiries across email security, SSO, DLP, portal, onboarding, and escalation workflows; led executive-facing war rooms with CSM, Support, Engineering, and Product Management, achieving 99% dedicated CSM coverage for enterprise clients over \$50K and onboarding outreach within a two-week SLA through process improvement and consistent internal controls.
- Reduced customer churn to under 30% within one year by implementing retention playbooks, proactive outreach, and health checks; aligned customer goals with SaaS product outcomes, tracked KPIs, and improved adoption, satisfaction, and renewals.
- Coordinated crisis response and incident resolution across Jira, AWS, Azure, and Salesforce CRM, improving time-to-resolution and contributing to a 20% sales increase within 6 months through stronger operational alignment and enterprise project management.
- Used Salesforce CRM and Custify to track customer interactions, identify upsell and cross-sell opportunities, and present ROI to stakeholders; increased customer-portfolio visibility from 40% to 99%, strengthening account management, client satisfaction, and AI-driven engagement optimization.
- Skills: Jira; Salesforce; process improvement; KPIs

Check Point Software Technologies Ltd.

November 2020 - September 2021

Customer Success Manager

College Station, TX (Remote)

- Managed a rotating portfolio of 20–40 customer accounts, from sub-\$50K customers to multi-million-dollar strategic relationships totaling approximately \$3M in account value; segmented coverage by renewal timing, adoption maturity, technical risk, customer complexity, and stakeholder engagement to prioritize support and sustain approximately 70% customer retention within six months.
- Analyzed product usage, telemetry, customer health, and business-review data to forecast adoption gaps, product friction, and renewal risk; translated findings into action plans and aligned Sales, Engineering, and Support on mitigation, contributing to 99.9% portal uptime and need-based upsell identification, particularly in legal tech.
- Built and maintained enterprise Customer Success Plans aligning business objectives, technical milestones, timelines, and stakeholder ownership; accelerated feature adoption, strengthened executive alignment, and contributed to 90%+ CSAT through structured value realization and customer journey planning.

- Developed strategic enterprise relationships by aligning stakeholders around complex technical needs, renewal priorities, upsell strategies, and email security requirements; achieved over 90% CSAT and 70% customer retention within six months.
- Prioritized competing customer and delivery needs by eliminating redundant work, clarifying ownership, and improving customer-facing workflows; increased team efficiency by 30% and contributed to a 3% year-over-year improvement in customer retention through cross-functional collaboration with Product Management and Support.

Dedrone

January 2020 - September 2020

Customer Success Manager

Sterling, VA (Remote)

- Spearheaded customer success initiatives that increased renewals 20% and accelerated sales through strategic enterprise onboarding, proactive client engagement, and AI-driven SaaS insights.
- Built and implemented an enterprise customer success onboarding program that standardized onboarding to one month and increased engagement 25% within six months through streamlined processes and automation.
- Secured stakeholder buy-in for a \$3M deal by demonstrating AWS-hosted dashboards and drone detection workflows during high-profile customer tours, strengthening client trust within 60 days.
- Increased renewal rates 20% through proactive engagement and continuous improvement of customer health and churn metrics; established cross-team communication channels and shared expectations to improve operating processes, collaboration, and retention.

Cofense (Formerly PhishMe)

November 2015 - January 2020

Technical Operations Center Manager for Reporter Triage & Vision

Leesburg, VA (Remote)

- Directed global support operations for Cofense's phishing-defense SaaS products, leading recurring-issue resolution, system reliability, uptime, customer success, and CRM-based problem-solving through Agile methodologies.
- Mentored geographically dispersed Support Engineers supporting Cofense Reporter, Triage, and Vision, achieving 65% product coverage while strengthening team development, technical support, and customer success across marketing technology and CRM integrations.
- Implemented Agile knowledge-sharing and process-improvement practices in Confluence, creating self-service documentation that deflected 30% of new tickets, achieved 90% average CSAT, and reduced First Response Time by 30 minutes within 3 months.

Cofense (Formerly PhishMe)

November 2015 - January 2020

Solutions Engineer

Leesburg, VA (Remote)

- Delivered L3 technical support for integrated email-client security solutions, bridging engineering and customer needs to reduce critical-issue resolution time by 25%; used Excel for data analysis and reporting to strengthen Professional Services and customer success.
- Led Agile delivery as Scrum Master and Interim Product Owner, improving cross-functional collaboration and technical-architecture alignment to accelerate releases by 30% within 6 months and reduce operational redundancy by 20%.
- Created and maintained Confluence product and process documentation for PhishMe Reporter, a SaaS solution for Lotus Notes, reducing support tickets by 40%; managed technical projects and budgets that saved tens of thousands of dollars, using web services and Excel to track metrics and increase adoption.

Texas A&M University System

February 2013 - October 2015

User Services Manager, Bush School of Government & Public Service

College Station, TX

- Directed IT services and infrastructure management for the Bush School, improving system performance, customer success, budget efficiency, operational workflows, technical architecture, user adoption, and compliance with industry standards.
- Oversaw video teleconference operations across enterprise IP systems and web services; developed hardware and software specifications and strengthened production control, disaster recovery, networking, documentation, and scalable operating processes, reducing annual costs by 15% through improved efficiency.
- Deployed a SpiceWorks ticketing system, increasing issue-resolution efficiency by 35% within 6 months and enabling historical analysis and self-service support; managed computing-system testing and application deployment in Docker and VMware, standardizing images and achieving 99.5% uptime during peak periods while supporting customer success, user adoption, and compliance.

IBM

June 2007 - February 2013

Enterprise Software Engineer

Austin, TX

- Delivered expert enterprise support for the Lotus Notes/Domino suite, strengthening technical architecture, operational efficiency, and global client satisfaction while directly supporting customer success.
- Provided 24x7 remote Lotus Notes/Domino support, resolving complex issues to sustain 99.9% uptime and 95+% customer satisfaction; ranked in the top 10% of 85 Austin division engineers.
- Developed and implemented cross-functional and external training programs, increasing training materials by 30%, reducing staff ramp-up time by 20%, and improving overall efficiency by 25% to enhance client satisfaction and engagement.

PROJECTS & OUTSIDE EXPERIENCE

Personal AI Exploration Initiative

Self-Hosted AI Server for Private Chat, Web Search, Persistent Memory, and Image Generation

College Station, TX, USA

- Engineered a high-performance local generative AI server for Stable Diffusion image generation, fine-tuning, and inference, applying GPU-accelerated computing to private content creation.
- Configured Stable Diffusion with Automatic1111 WebUI, ComfyUI, Forge, Docker, and CUDA for low-latency image generation on consumer-grade hardware.
- Designed and optimized the AI server architecture across hardware selection, OS installation, driver configuration, and performance tuning for complex generative AI workloads.

RenewNudge, AI Powered Customer Success CRM - [Link to project](#)

May 2026 - Present

Fully functional, solo built SaaS for renewal tracking, account health, and retention workflows

College Station, TX, USA

- Designed, built, and deployed a fully functional, multi-tenant AI-powered Customer Success CRM solo using React, TypeScript, TanStack Start, Supabase, and Tailwind for renewal tracking, account health monitoring, and retention workflows.
- Architected a secure multi-tenant Postgres backend with Row Level Security, role-based workspace membership, and SECURITY DEFINER policy helpers; conducted security scans and resolved findings to eliminate cross-tenant data exposure.
- Delivered end-to-end authentication with email/password and Google OAuth, team invites, and per-workspace seed and wipe flows, enabling users to sign up, invite teammates, and load sample data in under 1 minute.
- Applied customer success expertise in renewals, QBR preparation, health scoring, and at-risk playbooks to automate scattered CSM activities into a prioritized, action-oriented retention workflow.
