SUMMARY

Customer Success and technical operations leader with experience spanning enterprise support, cybersecurity, SaaS adoption, escalation management, renewals, process design, and practical automation. Known for connecting customer goals to technical action, building repeatable operating systems, and surfacing risk early enough to change the outcome.

SELECTED IMPACT

- **Renewals:** +20% renewal improvement and +25% engagement at Dedrone.
- **Portfolio scale:** Managed 20-40 named customers across sub-\$50K through multi-million-dollar strategic relationships, totaling about \$3M.
- **Visibility:** Improved usable portfolio visibility from roughly 40% to 99% while supporting broad shared-customer coverage.
- **Efficiency:** Drove approximately 30% team-efficiency improvement through process definition, routing, playbooks, and operating discipline.
- **Support:** Reduced critical-issue resolution time by 25%, reduced ticket volume through documentation and knowledge sharing, and maintained strong customer satisfaction.
- **Enterprise reliability:** Contributed to 99.9% uptime and 95%+ customer satisfaction in enterprise support environments.

EXPERIENCE

Dedrone | Customer Success / Technical Customer Leadership

- Owned adoption, stakeholder alignment, renewal readiness, technical risk, escalations, and executive customer communication.
- Improved renewals by 20%, engagement by 25%, and helped standardize onboarding to about one month.
- Supported stakeholder buy-in around an approximately \$3M AWS-hosted solution and coordinated cross-functional customer outcomes.

Check Point / Avanan | Customer Success / Shared Customer Operations

- Managed a rotating book of 20-40 customers totaling about \$3M while also supporting a broader shared customer motion.
- Handled email security, SSO, DLP, onboarding readiness, portal issues, licensing clarification, technical triage, and escalation routing.
- Improved portfolio visibility from roughly 40% to 99%, supported 99% dedicated CSM coverage for enterprise customers over \$50K, and maintained a two-week new-account outreach target.
- Built playbooks, reporting, handoffs, and operating structure that improved team efficiency by about 30%.

Cofense / PhishMe | Technical Customer Operations / L3 Support

- Led customer-facing technical operations across email-security products and complex enterprise issues.
- Improved critical-issue resolution by 25%; documentation reduced tickets by about 40% and knowledge sharing contributed to about 30% ticket deflection.
- Maintained approximately 90% customer satisfaction while coordinating technical investigations and customer communication.

Texas A&M; University | IT Services / Technical Operations

- Directed support, infrastructure, deployment, networking, and disaster-recovery activities in a high-availability environment.
- Improved issue resolution by 35%, reduced annual costs by 15%, and maintained 99.5% uptime during peak periods.

IBM | Enterprise Technical Support

- Provided 24x7 enterprise support for Lotus Notes / Domino environments serving global clients.
- Contributed to 99.9% uptime and 95%+ customer satisfaction and ranked in the top 10% of an 85-engineer Austin organization.

CORE STRENGTHS

Customer Success: Success plans, QBR/EBR, adoption, health, risk, renewal readiness, executive alignment, stakeholder management, and needs-based expansion.
